

Green Chemicals

Luxshare Precision is proactively advancing full lifecycle chemical management across our operations. Through close collaboration with suppliers, we rigorously control chemical substances present in manufacturing processes and product compositions, striving to minimize environmental and human health risks associated with chemical usage.

We continuously monitor evolving domestic and international hazardous substance management regulations (e.g., REACH, RoHS, SPM), and actively communicate with clients to ensure compliance.

We have established a hazardous substance management system spanning the entire product lifecycle, aligned with the Hazardous Substance Process Management (IECQ-HSPM) framework. This system enables **risk identification and tiered control of all chemicals** present in products and associated manufacturing processes.
